

Multiplication tables check taster tests

At the end of Year 4, students are required to do an online Multiplication Tables Check assessment.

The aim is to find out how well they have mastered their times tables and highlight where they may need extra learning support.

The following paper-based taster tests are designed to support students by helping them to identify which times tables need further attention prior to taking the test online.

All of the tests are based on the statutory framework to make them as realistic as possible.

If help is needed, we recommend the regular playing of the Tackling Tables cards/app – the fun and effective way to achieve times tables success!

Multiplication Tables Check Taster Test 1 (try to complete within 1 min 40 seconds)

Answers
